

Department of the organization and coordination of research works and the international scientific and technical cooperation

In 1964 the State Planning Committee of the USSR has confirmed VNIIMP leading research institute on coordination of research and developmental works in the meat industry of the USSR. With a view of realization of the given decision, at institute the department «Coordination of research works» which structure included sectors of research and developmental works and scientific and technical cooperation with foreign countries has been created.

With 1997 the order on institute creates Department «the Organization and coordination of research works and the international scientific and technical cooperation», united in it «the scientific part», department of coordination of scientific work and department of scientific and technical cooperation with foreign countries which exists in such kind till now.

The department «the Organization and coordination of research works and the international scientific and technical cooperation», Department called further, is structural division of VNIIMP of V.M.Gorbatov.
